DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tang (US 4,772,992).

Referring to Claim 1 Tang discloses (Fig.1) a shade [22] having a first end and a second end, an upper ring [26] detachably mounted on the first end of the shade and a lower ring [30] detachably mounted on the second end of the shade.

Referring to Claims 2, 4 Tang discloses that the shade is foldable (see Fig.6) and made of flexible material (col.2, lines 67, 68).

Referring to Claim 3 Tang discloses that the shade is made of cloth (col.2, lines 43, 44).

Referring to Claim 5 Tang discloses (Fig.3) that the first end of the shade has a plurality of elastic locking plates [22] snapped the rim of the upper ring [26].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tang (US 4,772,992) in view of Borowitz (US 4,275,434).

Tang discloses the instant claimed invention except for bonding straps.

Borowitz discloses (Figs.9, 11, 12) a lamp shade [22] having a plurality of bonding straps [110] which are joined by stitching to terminal portions of the cover [22] except for that the lower ring is also provided with a plurality of bonding straps provided for the lower ring of the lamp frame, as claimed in the instant application. Attachment shown by Borowitz is an equivalent structure known in the art. Therefore, because these two structures were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute bonding straps provided for the shade only for the straps provided for the shade and the lower ring of the frame, what allow to decrease the price of the lamp.
